

🔧 Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.Scanner;
2 public class Debug1{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         int arr[]={20,40,60,80};
6         int index=sc.nextInt();
7         int divisor=sc.nextInt();
8         try{
9             int value=arr[index];
10            try{
11                int result=value/divisor;
12                System.out.println(result);
13            }
14            catch(ArithmeticException e){
15                System.out.println("Division by Zero");
16            }
17        }
18        catch(ArrayIndexOutOfBoundsException e){
19            System.out.println("Invalid Index");
20        }
21        sc.close();
22    }
23 }
24 }
```

Test Input

1
0

Output

Division by Zero

 **Debugging Task:** Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.*;
2 public class Calculator{
3     static int divide(int a, int b){
4         return a/b;
5     }
6     static void display(int x){
7         System.out.println("Answer = "+x);
8     }
9     public static void main(String[] args){
10         Scanner sc=new Scanner(System.in);
11         int a=sc.nextInt();
12         int b=sc.nextInt();
13         try{
14             Calculator.display(Calculator.divide(a,b));
15         }
16         catch(ArithmeticException e){
17             System.out.println("Cannot Divide by Zero");
18         }
19         finally{
20             System.out.println("Execution Completed");
21         }
22         sc.close();
23     }
24 }
```

Test Input

36 6

Output

```
Answer = 6
Execution Completed
```
